4 INTRODUCTION

- The Governing Body of [Chiltern Wood School](#) will ensure that all children with medical conditions, in terms of both physical and mental health, are properly supported in school so that they can play a full and active role in school life. To help achieve this, the school has adopted the Department for Education policy on “Supporting Pupils at School with Medical Conditions”, which was issued under Section 100 of the Children and Families Act 2014.
- The aim of this policy is to ensure that the parents of children with medical conditions feel confident that the school will provide effective support and that children feel safe and reach their full potential.
- Some children with medical conditions may be considered to be disabled under the definition set out in the Equality Act 2010. The school will comply with their duties under the Act to make reasonable adjustments to support pupils with disabilities.
- Some children with medical conditions may also have special educational needs (SEN) and may have an Education, Health and Care (EHC) Plan which brings together health and social care needs as well as the provision for their special educational needs. Where the child has a special educational need identified in a statement or EHC plan, the individual healthcare plan will be linked to or become part of that statement or EHC plan. The Healthcare Plan will be developed with the child’s best interests in mind to ensure that the risks to the child’s education, health and social wellbeing are managed, and minimises disruption, for children with medical conditions.
- Supporting a child with a medical condition during school hours is not the sole responsibility of one person. The school will work collaboratively with parents/[carers](#), pupils, healthcare professionals (and, where appropriate, social care professionals) and local authorities to ensure that needs of pupils with medical conditions are met effectively.

5. ROLES AND RESPONSIBILITIES

5.1 The **Governing Body** for **Chiltern Wood School** will ensure that

- arrangements are in place so that children with medical conditions
 - are properly supported
 - can play a full and active role in school life
 - can remain healthy and achieve their academic potential
- staff are properly trained to provide the support that pupils need
- in line with their safeguarding duties, ensure that pupil's health is not put at unnecessary risk from, e.g. infectious diseases
- in those circumstances, they do not have to accept a pupil at time where it would be detrimental to the health of that child or others to do so.

5.2 The **Headteacher** will ensure that

- a person is appointed to have overall responsibility for the implementation of this policy; **this person is Una-Lynne Mackey**
- all staff are aware of the policy for supporting pupils with medical conditions and understand their role in its implementation
- all staff including supply staff who support children with medical needs receive sufficient information to provide appropriate support
- Individual Healthcare Plans are developed, monitored and reviewed annually or earlier if evidence is presented that the child's needs have changed. Where appropriate Healthcare Plans will be reviewed at the child's Annual Review. **Parents/carers will be requested to review and agree plans each year. The collation of information for the Health Care Plans is overseen by the School Nurses who are supported by the Teachers to gather the information and the Admin Team who are responsible for the information in a typed format that is saved on the T drive. A flowchart is available to illustrate the process.**
- sufficient staff are suitably trained and achieve the necessary level of competency before they take on responsibility to support children with medical conditions: **the school will endeavour to ensure that each class group will have**

at least one trained member of staff who is able to administer medicines or carry out a specific procedure for a pupil.

- sufficient numbers of trained staff are available to support all individual healthcare plans to cover staff absence, contingency and emergency situations; if a situation occurs when this is not possible, parents will be informed and the school will endeavour to rectify the training deficit.
- a register of children in the school is kept who have been diagnosed with asthma and/or prescribed a reliever inhaler; this is kept at both site and is site specific.
- all staff are trained to recognise the symptoms of an asthma attack (and are able to distinguish them from other conditions with similar symptoms); Information posters are displayed in all classrooms. This training will be revised annually.
- Each site has two emergency inhaler kits which are maintained and readily available in an emergency situation [Downley site: Medical Room and Staff room. Cressex Site: SLT corridor and Little Wings Department]
- a register of children in the school is kept who have been diagnosed with anaphylaxis and/or prescribed a epi pen/auto injector
- all staff are trained to recognise the symptoms of anaphylaxis
- ~~• at least one emergency anaphylaxis kit is maintained and readily available in an emergency situation (delete if not available)~~
- ~~• staff are trained to use a defibrillator, Each site has two defibrillators which are maintained and readily available in an emergency situation. (delete if not available)~~
- risk assessments for school visits, holidays, and other school activities outside of the normal timetable are undertaken for children with medical conditions. This information is included in EVOLVE planning and CWS daily 'Walkout' forms.
- all staff are aware that medical information must be treated confidentially
- school staff are appropriately insured and are aware that they are insured to support pupils in this way.

5.3 Appointed Person

Una-Lynne Mackey, Deputy Head teacher, has been appointed to have overall responsibility for implementing the school's policy for supporting pupils with medical conditions. She will ensure that children with medical conditions are

appropriately supported, ensure cover for 1:1 in case of absence and briefing supply staff. Lynn King [Downley] and Su Holland [Cressex] will support this role and the implementation of procedures across both sites. The school employs a full-time Nurse covered by two NHS staff to support the health needs of the pupils.

In addition, it is the responsibility of all school staff to report any concerns to Una-Lynne Mackey, the School Nurses or Su Holland regarding any concerns relating to the storage of medicines, the administering of medicines or any other related issues.

5.4 Transitional Arrangements

The school has made the following procedures for transitional arrangements.

- Pupils leaving CWS will have medical information passed on to the new receiving school. A copy of the HCP can be shared with parental permission.

5.5 All members of School Staff may be asked to provide support to pupils with medical conditions, including administering medicines

- All members of staff should know what to do and respond accordingly if they become aware that a pupil with a medical condition needs help
- Although administering medicine is not part of teacher's professional duties, teachers should take into account the needs of pupils with medical conditions that they teach.
- Staff must not give prescription medication or undertake healthcare procedures without appropriate training

5.6 Pupils

- Where appropriate pupils with medical conditions will be consulted to provide information about how their condition affects them.
- Where appropriate pupils with medical conditions will be fully involved in discussions about their medical support needs and contribute as much as possible to the development of, and comply with, their individual healthcare plan.

Some pupils at CWS have significant learning disabilities so an adult will be required to support them to accept, understand or tolerate medical support that has been agreed by their advocates. For pupils that have more understanding of their medical needs they will be encouraged to contribute as appropriate.

5.7 Parents have the prime responsibility for their child's health. Parents include any person who is not a parent of a child but has parental responsibility for or care of a child.

- It only requires one parent to request that medicines are administered. As a matter of practicality, this will be the parent with whom the school has day-to-day contact.
- Parents should provide the school with sufficient and up to date information about their child's medical needs. Parents should tell the school of any change in prescription which should be supported by either new directions on the packaging of medication or by a supporting letter from a medical professional.

Sometimes it may be necessary to request support from the School Nurse as there can be a delay in obtaining written confirmation from a medical doctor.

- Parents are key partners and will be involved in the development and review of the Healthcare Plan for their child. A request will be sent to parents using the [Chiltern Wood School Template](#)
- Parents should provide medicines and equipment as required by the Healthcare Plan.

Parents should:

- bring their child's medication and any equipment into school at the beginning of the school year
- replace the medication before the expiry date
- as good practice, take into school the new asthma reliever inhaler when prescribed [including any replaced 'spacer'](#)
- dispose of expired items to a pharmacy for safe disposal
- during periods of high pollen count, encourage their children, who have been prescribed anti-histamines, to take their medication before school so that their condition can be better controlled during the school day
- keep their children at home when they are acutely unwell
- Parents should ensure that they or another nominated adult are contactable at all times

6. STAFF TRAINING AND SUPPORT

- [Una-Lynne Mackey](#) will ensure that all staff are aware of the school's policy for supporting pupils with medical conditions and their role in implementing the policy.
- Any member of staff who agrees to accept responsibility for administering prescribed medicines to a child does so voluntarily and will have appropriate training and guidance. [Staff need to request training if they are asked to administer a medication or conduct a procedure they know they have not been trained to do.](#)

[There are some procedures that are not permitted to be carried out by non health professionals which involve invasive and medical procedures.](#)

- Training needs will be identified during the development or review of individual healthcare plans and will be reviewed annually. The family of a child will often be key in providing relevant information to school staff about how their child's needs can be met, and parents will be asked for their views but will not be the sole trainer.
- Training will be provided for staff to ensure that they are competent and have confidence in their ability to support pupils with medical conditions, and to fulfil the requirements as set out in individual healthcare plans. Training for new staff will be provided ~~on~~ [following](#) induction;
- Training will be provided by an appropriate healthcare professional so that staff have an understanding of the specific medical conditions they are being asked to deal with, their implications and preventative and emergency measures so that they can recognise and act quickly if a problem occurs. Template G may be used to confirm staff training. [CWS CPD/Admin collate a training spreadsheet for staff.](#)
- Only staff with appropriate training will give prescription medicines or undertake healthcare procedures. (A first-aid certificate does not constitute appropriate training in supporting children with medical conditions).
- The school will ensure that an appropriate number of people have attended Supporting Pupils at School with Medical Conditions training to understand County policy and to ensure medicines are appropriately managed within the school. BCC recommend training at least three people to cover sickness, absence or school trips.

7. INDIVIDUAL HEALTHCARE PLANS

A Healthcare Plan clarifies for staff, parents and the pupil the support that can be provided. Individual Healthcare Plans for pupils with medical conditions, (e.g. asthma, anaphylaxis, diabetes, epilepsy) will be drafted with parents/pupils and other healthcare professionals where appropriate. The plan will include:

- the medical condition, its triggers, signs, symptoms and treatments
- the pupil's resulting needs, including medication (dose, side effects and storage) and other treatments, time, facilities, equipment, testing, access to food and drink where this is used to manage their condition, dietary requirements and environmental issues e.g. crowded corridors, travel time between lessons
- specific support for the pupil's educational, social and emotional needs – for example, how absences will be managed, requirements for extra time to complete exams, use of rest periods or additional support in catching up with lessons, counselling sessions
- the level of support needed (some pupils will be able to take responsibility for their own health needs) including in emergencies. If a pupil is self-managing their medication, then this will be stated with appropriate arrangements for monitoring
- who will provide this support, their training needs, expectations of their role and confirmation of proficiency to provide support for the pupil's medical condition from a healthcare professional; and cover arrangements for when they are unavailable
- who in the school needs to be aware of the pupil's condition and the support required
- arrangements for written permission from parents and the **oversight of the Headteacher [this responsibility is delegated]** for medication to be administered by a member of staff, or self-administered by the pupil during school hours
- separate arrangements or procedures required for school trips or other school activities outside of the normal school timetable that will ensure the pupil can participate, e.g. risk assessments
- where confidentiality issues are raised by the parent/child, the designated individuals to be entrusted with information about the child's condition; and
- what to do in an emergency, including whom to contact, and contingency arrangements.

Some pupils may have an emergency healthcare plan prepared by their lead clinician that could be used to inform development of their individual healthcare plan. **It is important that the HCP includes any Advanced Directive information.**

Healthcare Plans will be reviewed at least annually but some may need to be reviewed more frequently. Where appropriate the Healthcare Plan will be reviewed at the pupil's Annual Review.

8. THE PUPIL'S ROLE IN MANAGING THEIR OWN MEDICAL NEEDS

- After discussion with parents, pupils who are competent will be encouraged to take responsibility for managing their own medicines and procedures. Parents will be asked to sign Template F to acknowledge that their child is mature and responsible to manage their own medication. This information will be recorded in the Healthcare Plan. *It is unlikely that the majority of pupils will be able to manage their own medication at CWS.*
- Parents should be aware that if their child holds their own medication then school staff will not be recording the doses self-administered;
- If it is not appropriate for a child to self-manage, then relevant staff will help to administer medicines and manage procedures for them; a record of administration will be made.
- If a pupil refuses to take medicine or carry out a necessary procedure, staff will not force them to do so but will contact the parents and follow the procedure agreed in the individual healthcare plan. *Staff may need to encourage and offer choices so that children receive medication appropriately. Parents can often suggest ways to support this.*
- Parents will be contacted where a pupil is seen to be using their asthma inhaler more frequently than usual as this may indicate their condition is not well controlled.

Add your procedures here for allowing pupils to carry their own medicines and relevant devices or where they can access their medication for self-administration quickly

Pupils are unlikely to be cognitively able to manage their own medication at CWS

9. MANAGING MEDICINES ON SCHOOL PREMISES

Pupils will only be given prescription or non-prescription medicines after parents have completed a consent form (Template B) – (except in exceptional circumstances where the medicine has been prescribed to the child without the knowledge of the parents. In such cases the school will encourage the pupil to involve their parents while respecting their right to confidentiality). This is highly unlikely to be an issue at CWS.

In order to support children in school, in exceptional circumstances, the Operational Lead can authorise an initial dose of a prescribed or non prescribed medicine such as liquid paracetamol with parental permission by telephone. The Record of Conversation will be logged and a consent form completed by the parent, will be required for any subsequent dose.

If the Operational Lead has any concerns about a medication that has not been consented for then the parent will need to come to school and administer the medication.

When no longer required, medicines will be returned to the parent to arrange for safe disposal. Sharps boxes will be used for the disposal of needles and other sharps. [Sharps boxes need to be supplied by the parent with the medication].

Medicine brought into school is usually carried in the pupil's bag- a member of the class team will be responsible for retrieving this and transferring it to the requisite Medical Cabinet- each class will have access to one.

9.1 Prescribed medication the school will only accept prescribed medicines that are in-date, labelled, provided in the original container as dispensed by a pharmacist and include instructions for administration, dosage and storage. The exception to this is insulin which must still be in date, but will be available inside an insulin pen or a pump, rather than in its original container

- Parents should note the expiry date so that they can provide a new prescription as and when required.
- Medicines will only be administered at school when it would be detrimental to a child's health or school attendance not to do so. At CWS we will endeavour to be supportive and have empathy with families in order to enable all pupils to access education safely and free from discomfort.
- Where clinically possible, medicines should be prescribed in dose frequencies which enable them to be taken outside school hours. [see above]

Short-Term Medical Needs

Many children will need to take medicines during the day at some time during their time in the school. This will usually be for a short period only, perhaps to finish a course of antibiotics, which will minimise the time that they need to be absent.

Antibiotics prescribed three times a day can be taken out of the school day. The school will support children who have been prescribed antibiotics that need to be taken **four** times day. This is the ideal situation and CWS will take a child specific approach that is in the best interest of the individual.

Chiltern Wood School will support parents/carers with the administration of short term medication such as an antibiotic. As pupils are transported to school by taxi, CWS will not expect parents/carers to bring medication to school each day to sign it in. Parents/carers will ensure that the medicine is transported safely with the pupil and the staff with responsibility will collect it from the school bag on entry to school. Staff will ensure that the medication is returned home via the same route. Parents and carers will complete the necessary forms prior to the first school dose.

Arrangements will be the same if a child stays to an After School club or goes to respite.

9.2 Controlled Drugs

- Some medicines prescribed for pupils (e.g. methylphenidate, known as Ritalin) are controlled by the Misuse of Drugs Act, 1971. A pupil who has been prescribed a controlled drug may legally have it in their possession if they are competent to do so, but passing it to another pupil for use is an offence.
- The school will keep controlled drugs in a locked non-portable container, to which only named staff have access but will ensure they are easily accessible in an emergency.
- School staff may administer a controlled drug to the child for whom it has been prescribed in accordance with the prescriber's instructions.

Add list of named staff who have access to the Controlled Drugs cabinet and have agreed to administer medication and have received training

- *Staff who have been trained to administer medication will be able to give a controlled drug to a pupil in their class. This medication will require two people to be present and to check against the 6 Rights – see attached. The record of administration will be witnessed in the class Medication Record Book*
- A record will be kept of any doses used and the amount of the controlled drug held in school, i.e. total number of doses (tablets) provided to the school, the dose given and the number of doses remaining.

- where the dose is half a tablet then this will be cut using a tablet cutter at the time that the medication is required
- half tablets will be retained but not issued at the time of the next dose; a fresh tablet will be cut
- half tablets will be returned to the parent for disposal.
- A controlled drug, as with all medicines, will be returned to the parent when no longer required to arrange for safe disposal. If this is not possible, it will be returned to the dispensing pharmacist.

The Deputy Head teachers or School Nurse may occasionally return medicines to the local pharmacy when this is appropriate and will receive a signed receipt to be kept on record.

9.3 Non-prescription Medication

Primary Schools

Non-prescription medication will only be given in exceptional circumstances and only with the expressed permission of the Headteacher or Deputy Head teachers. An exception may be made for school residential visits.

~~The school will not keep Calpol or hay fever remedies to administer on an ad-hoc basis during the school day. Parents will be contacted if their child has a fever. If pupils require medication to control hay fever symptoms then parents will be asked to take their children to their GP for a formal diagnosis and advice on appropriate medication.~~

~~(Add your arrangements for administering non-prescription medication here)~~

CWS may keep a generic bottle of liquid paracetamol [Calpol]- As a Special School we may be asked to administer to reduce a temperature that could cause a seizure- most parents/carers provide individual medication so this would be in exceptional circumstances.

*The school staff administering non prescribed medication **will always** check the time of the previous dose with parents before giving a further dose.*

Parents will be asked to sign a consent form confirming that the medicine has been administered without adverse effect to the child in the past and that they will inform the school immediately if this changes.

9.4 Pain Relief

Pupils sometimes ask for pain relief (analgesics) at school, i.e. paracetamol tablets or liquid.

Chiltern Wood School

- Pain relief will only be given with the expressed consent of the Headteacher or Deputy Head teachers for example, for pupils returning to school after sustaining a fracture, dental treatment or older girls with dysmenorrhoea (painful periods).
- Parents will be asked to sign a consent form when they bring the medicine to school, which confirms that they have given the medicine to their child without adverse effect in the past and that they will inform the school immediately if this changes.
- The school will only administer paracetamol to those pupils requesting analgesics; generally non-prescription ibuprofen will not be given.
- If ibuprofen is the analgesic of choice then parents will be advised that a dose could be given before school (ibuprofen is effective for six hours); if required the school will 'top up' the pain relief with paracetamol.
- A child under 16 will never be given aspirin-containing medicine unless prescribed by a doctor.
- When a pupil requests pain relief staff will first check maximum dosages and when the previous dose was taken. Parents will be contacted for confirmation. If parents are unavailable, a dose will not usually be given before 12 noon.
- A record will be made of all doses given using The Bound Administration of Medicines Record book and parents will be informed by the most appropriate method if any medications are given during the day.

Secondary School *(delete as required)*

- ~~• Parents will be asked to sign a consent form confirming that the medicine has been administered without adverse effect to their child in the past and that they will inform the school immediately if this changes.~~
- ~~• The school holds a supply of paracetamol based pain relief, which will be issued to those pupils on request, whose parents have signed a consent form. *(delete as appropriate)*~~
- ~~• The school will hold non-prescription analgesics on behalf of pupils on request. The medication must be brought into school in the original packaging and a consent form signed. *(delete as appropriate)*~~
- ~~• Pupils are permitted to carry their own analgesics. *(delete as appropriate)*~~
- ~~• The school will only administer paracetamol to those pupils requesting analgesics; generally non-prescription ibuprofen will not be given.~~

- ~~If ibuprofen is the analgesic of choice then pupils/parents will be advised that a dose could be taken before school (ibuprofen is effective for six hours); if required the school will 'top up' the pain relief with paracetamol.~~
- ~~A child under 16 will never be given aspirin-containing medicine unless prescribed by a doctor.~~
- ~~When a pupil requests pain relief, staff will first check maximum dosages and when the previous dose was taken. Parents will be contacted for confirmation. If parents are unavailable, a dose will not usually be given before 12 noon.~~
- ~~A record will be made of all doses given using either Template D or E.~~

10. RECORD KEEPING

- The school will keep a record of all medicines administered to individual pupils, using stating what, how and how much was administered, when and by whom in the [Bound Administration of Medicines Record book](#). Any side effects of the medication to be administered at school will be noted.
- A second person will witness the administration of all medicines including controlled drugs. ~~(delete as appropriate)~~
- A second person will witness the administration of controlled drugs. ~~(delete as appropriate)~~
- A record of administration of medicine will not be recorded where the pupil has taken responsibility for their own medication, e.g. asthma inhalers and take their medication, as and when it is required. [This is unlikely with pupils at CWS.](#)

[Parents will be informed if their pupil has used their asthma inhaler at school during the day. All pupils will need to use their inhaler with a spacer due to their cognitive and physical abilities.](#)

A record will be made where medication is held by the school but self-administered by the pupil.

11. SAFE STORAGE OF MEDICINES

- Medicines will be stored strictly in accordance with product instructions - paying particular note to temperature and in the original container in which dispensed.
- Pupils know where their medication is stored and are able to access them immediately or where relevant know who holds the key.

Class staff will know which pupils have medication and where it is stored. They will read all sections of the Health Care Plan. They will know who is required to administer medication and how to gain swift access. All staff will know what signs to look for that may require medication to be administered.

- Medicines and devices such as asthma inhalers, blood glucose testing meters and adrenaline pens are always readily available and not locked away.
- A few medicines require refrigeration. They will be kept in a clean storage container, clearly labelled, and stored in the Staff Room/Medical Room, refrigerator, which is not accessible to pupils. A temperature log of the refrigerator will be taken during the period of storage. (recommended temperature is between 2C & 8C)
- Medication will never be prepared ahead of time and left ready for staff to administer.
- An audit of pupil's medication will be undertaken every half term disposing of any medication that is no longer required.
- It is the parent's responsibility to ensure their child's medication remains in date. The school will/will not (*delete as appropriate*) remind parents when their child's medication is due to expire.

12. DISPOSAL OF MEDICINES

- Parents are responsible for ensuring that date-expired medicines are returned to a pharmacy for safe disposal. The return of such medicines to parents will be recorded;
- Parents/*carers will receive* ~~should also collect~~ medicines held at the end of the summer term. If parents do not collect all medicines, they will be taken to a local pharmacy for safe disposal;

Medicines such as Buccal Midazolam are very expensive and parents/carers are required to have more than one set [home/school/respite] which reduces the opportunity to mislay medicines. It would not make good sense to dispose of efficacious medicines. In the unlikely event that a medication is not sent home it can be safely stored in the locked medicine cupboard.

- Sharp boxes will always be used for the disposal of needles.

13. HYGIENE AND INFECTION CONTROL

All staff should be familiar with normal precautions for avoiding infection and follow basic hygiene procedures.

8 STEP HAND WASHING TECHNIQUES

14. DAY VISITS, RESIDENTIAL VISITS AND SPORTING ACTIVITIES

- The school will actively support pupils with medical conditions to participate in school trips and visits or in sporting activities;
- The school will make reasonable adjustments for the inclusion of pupils in such activities; CWS provide lockable, portable, medical bags for school trips.

- Some children may need to take precautionary measures before or during exercise, and may need access, for example, to asthma inhalers. Staff supervising sporting activities will be made aware of relevant medical conditions, and will consider the need for a risk assessment to be made.
- The school will consider the reasonable adjustments that can be made to enable pupils with medical needs to participate fully and safely in visits. These arrangements will be included in the risk assessment for the event.
- One member of staff accompanying the visit will be asked to take on the lead role for administering medicines or healthcare procedures. Individual Healthcare Plans, medicines, equipment and consent forms will be taken on school visits.
- Medicines are administered and witnessed and recorded on a copy of Templates D or E. This form is added to the file on return from the visit.

15. SCHOOL'S ARRANGEMENTS FOR COMMON CONDITIONS

15.1 Asthma

- An inventory of all pupils with asthma will be compiled
- An Individual Healthcare Plan will be developed
- All staff will be trained annually to recognise the symptoms of an asthma attack and know how to respond in an emergency following the guidance in Templates Q and R
- ~~Add your own procedures here for pupils who have been prescribed reliever inhalers, e.g. storage, availability, procedures for self-management, record keeping etc.)~~

~~(Delete the following section if school has not provided an emergency salbutamol inhaler)~~

- Emergency salbutamol inhalers and spacers are kept
..... (add your own details here)
- Emergency salbutamol inhalers will only be given to pupils previously diagnosed with asthma whose reliever inhaler is not in school or whose inhaler has run out, who are on the register and whose parents have signed the consent form
- All staff will know how and when to use the emergency salbutamol inhaler
- Parents will be asked to sign Template L giving permission to administer an emergency dose(s);
 - Parents will be informed of any emergency dosages given using Template M.

15.2 Anaphylaxis (Severe Allergic Reaction)

- An inventory of all pupils with anaphylaxis will be compiled
- All staff will be trained annually on the symptoms of anaphylaxis, and how to respond in an emergency following Template S
- An Individual Healthcare Plan will be developed which includes the arrangements the school will make to control exposure to allergens
- Auto-injectors will be kept readily available
- ~~• Add your own procedures here for pupils who have been prescribed epi-pens/jext pen, e.g. storage, availability, procedures for self-management, record keeping etc.)~~
- Some staff have been trained to use adrenalin via a pen and can recognise the symptoms of anaphylaxis and signs of allergic reaction. Staff need to be aware of all pupils/young people that may need emergency medication or emergency action [call ambulance].
 - ~~• Emergency Adrenaline Auto Injectors (AAI's) are kept
.....(add your own details here)~~
 - ~~• Emergency Adrenaline Auto Injectors (AAI's) will only be given to pupils previously diagnosed with anaphylaxis whose AAI is not whose AAI has run out, who are on the register and whose parents have signed the consent form~~
 - ~~• All staff will know how and when to use the Emergency Adrenaline Auto Injector (AAI)~~
 - ~~• Parents will be asked to sign Template N giving permission to administer an emergency dose(s)~~
 - ~~• Parents will be informed of any emergency dosages given using Template in school or~~
 - The school has planned to have two auto injectors on each site –one for children under 6 and one for children 6-12years [not purchased yet]

15.3 Epilepsy

- An Individual Healthcare Plan will be developed
- A appropriate number of staff will be trained in identifying the symptoms and triggers for epilepsy, including administering medication
- There will be a trained member of staff available **at all times** to deliver emergency medication. Details will be recorded on the pupil's Healthcare Plan
- A medical room with a bed will be kept available so that if needed the pupil will be able to rest following a seizure, in a safe supervised place
- The school will offer support with a mentoring or buddying system to help broaden an understanding of the condition
- The school will enable students to take a full part in all outings and activities
- The school will make necessary adjustments e.g. exam timings, coursework deadlines, timetables
- The school will liaise fully with parents and health professionals

- Some pupils with epilepsy are prescribed rectal diazepam or buccal midazolam. This will be administered by staff who are specifically trained to undertake this task and have agreed to this responsibility
- The administration of medication will be recorded ~~on Template H or I as appropriate~~ in the Bound and Numbered Medication Record Book kept in each class
- Two adults will be present for the administration of rectal diazepam, at least one being of the same gender as the child. The dignity of the pupil will be protected as far as possible, even in an emergency
- If appropriate, a record will be kept of the pupil's seizures, using Template P, so that any changes to seizure patterns can be identified and so that this information can be shared with the pupil's parents and healthcare team *Some children have individual charts that are specific to their needs and are shared with other medical professionals*
- ~~Add your own procedures here for pupils who have been prescribed medication to prevent a second seizure, e.g. storage, availability, record keeping etc.)~~

15.4 Diabetes

- An Individual Healthcare Plan will be developed;
- Pupils diagnosed with Type 1 diabetes and have been prescribed insulin will be supported by staff who have specifically agreed to this responsibility and have received training and support from the Diabetic Nurses Team.
- A suitable private place will be provided for pupils to carry out blood tests and administer doses, e.g. Medical Room;
- Pupils will not be prevented from eating drinking or taking toilet breaks whenever they need to in order to manage their medical condition effectively.
- If a pupil has a hypo, they will not be left alone; a fast acting sugar, such as glucose tablets, a glucose rich gel, or a sugary drink will be given immediately.
- Once the pupil has recovered, slower acting starchy food, such as a sandwich or two biscuits and a glass of milk, will be given, some 10-15 minutes later.

~~Add your own procedures here for pupils who have been prescribed insulin, e.g. storage, availability, procedures for self-management, record keeping etc.)~~

Some pupils have diabetes testing and medication at CWS. General awareness of the condition will be available as training but pupil specific information will be sought from a trained diabetes health professional.

Annual refresher training is required for staff supporting children with diabetes controlled with insulin.

16. LIABILITY AND INDEMNITY

The Governing Body will ensure that the appropriate level of insurance is in place for staff providing support to pupils with medical conditions and appropriately reflects the level of risk.

The school will contact their insurers to extend their cover should a medical intervention fall outside the conditions covered by this policy.

17. COMPLAINTS

Parents/pupils should discuss any concerns directly with the school if they become dissatisfied with the support provided. If for whatever reason this does not resolve the issue, they may make a formal complaint via the school's complaints procedure.

18. SCHOOL PROCEDURES FOR MANAGING MEDICINES

(Suggested School procedures – amend as appropriate)

- 1 Medicines should be brought into school office/medical ~~(delete as appropriate)~~ room by ~~(insert time)~~ by parents/carers, by pupils or taxi drivers ~~(delete as appropriate)~~. In their school bags. The designated member of staff will transfer the medicine to the medicine cabinet in the classroom. All medication given in school will have been consented to prior to administration except on extraordinary occasions. ask the parent to sign the relevant consent form or check the form downloaded from the school's website.
- 2 The designated person will check that the
 - medicine is in its original container as dispensed by a chemist and details match those on the form;
 - label clearly states the child's
 - first and last name
 - name of medicine
 - dose required
 - method of administration
 - time/frequency of administration
 - patient information leaflet is present to identify any side effects;
 - medication is in date

- 3 The designated person will log the medicine in the record book and store the medicine appropriately
 - Medicines requiring refrigeration will be kept in the fridge in a clean storage container
 - A daily temperature of the fridge will be taken and recorded.
- 4 The designated person will administer medication at the appropriate time.
- 5 The following procedure will be followed:

Staff are encouraged to follow the six rights attached to this document

- ~~The pupil will be asked to state their name—this~~ The designated person will ascertain that the medication is given to the correct pupil and that the name is checked against the label on the bottle, authorisation form and record sheet.
 - The name of the medicine will be checked against the authorisation form and record sheet.
 - The time, dosage and method of administration will be checked against the authorisation form and record sheet.
 - The expiry date will be checked and read out.
 - The medicine is administered.
 - The record sheet is signed by the designated person and the witness (*Controlled medication must be witnessed by a second adult. Some schools prefer that all medication is witnessed by a second adult*)
 - Any possible side effects will be noted.
 - The medicine is returned to appropriate storage.
- 6 If a child refuses to take their medicine, staff will not force them to do so. Staff will record the incident and follow agreed procedures (which are set out in the pupil's Healthcare Plan) and contact parents. If a refusal results in an emergency, the emergency procedures detailed in the Healthcare Plan will be followed.
 - 7 If the designated person has concerns about a procedure or a medication that they are being asked to administer they will not administer the medicine, but check with the parents or a health professional before taking further action.
 - 8 **Primary Schools:** ~~At the end of the day parents of pupil's prescribed anti-biotic medication (four doses a day) should collect their child's medicine from the school office and sign it out. For children staying to the After School Club the designated person(s) will pass anti-biotic medicine to the supervisor of the After School Club to return to the parents. The After School Club Supervisor will sign~~

and date the back of the authorisation form to confirm that they have received the medicine and accept responsibility to return it to parents.
